

PRICING AND MODULE GUIDE

One inspection platform. Every built asset workflow.

Configure the disciplines you need, then pay for reports, field outputs, AI, workforce access and data storage as they create value.

A\$50 per discipline module, per
workspace, per month

Facade

Structures

MEP

Compliance

Safety

Workforce

Build the workspace you need

Simple module fees, transparent usage pricing and one consolidated company invoice.

DISCIPLINE MODULES

A\$50

 / module / month

Facade, Structures, MEP, Compliance and Safety each use the same default monthly rate.

WORKFORCE

No flat fee

Enable the module for the workspace, then choose per-site or unlimited pricing for each active person.

Veritas Facade

A\$50

 / month

Audits, defects, reports and remediation.

Veritas Structures

A\$50

 / month

Assessments, investigations and condition reporting.

Veritas MEP

A\$50

 / month

Servicing and maintenance for building systems.

Veritas Compliance

A\$50

 / month

Anchor testing, certification and product qualification.

Veritas Safety

A\$50

 / month

Safety authoring, rescue, ITPs and sign-on records.

Veritas Workforce

Usage

 based

A\$5 per active site or A\$150 unlimited per person monthly.

A\$50/month

One discipline module

A\$150/month

Any three discipline modules

A\$250/month

All five discipline modules

Only pay for what is active

Modules can be added to a workspace as needs expand. Report, docket, storage, AI, 3D and Workforce usage charges are separate and are detailed later in this guide.

Inspect, understand and act

A\$50 / MONTH

01

Veritas Facade

A complete facade inspection workflow from site capture to client-ready reporting and repair closeout.

- Facade audits, condition reports, post-storm and annual reviews
- Mobile defect capture with severity, risk, location and photo evidence
- Elevation, zone, BMU drop and window-location mapping
- Standard and engineering report pathways
- Remediation packages, progress tracking and closeout packs

A\$50 / MONTH

02

Veritas Structures

Structured investigation and reporting for structural condition, defects and engineering review.

- Structural assessments, investigations and condition assessments
- Dilapidation, compliance and pre-purchase inspection types
- Photo-led evidence capture linked to asset locations
- Risk, priority and estimated-remediation views
- Professional report generation with engineering review options

A\$50 / MONTH

03

Veritas MEP

Plan, deliver and document mechanical, electrical and plumbing service work in one operational record.

- UPS, CRAC, generator, HVAC, fire and electrical service workflows
- Asset registers, work items, readings, photos and service evidence
- Daily dockets, attendance and progress reporting
- Maintenance scheduling and package-level completion tracking
- Professional maintenance works reports

SHARED PLATFORM

One asset record

Every discipline can work from the same buildings, drawings, users, evidence, schedules and billing controls.

- Tenant-branded portal, emails and PDF outputs
- Role-based access for admins, inspectors, clients and viewers
- Shared schedules and inspector assignment
- 3D models, document storage and AI-assisted workflows
- Weekly, asset-attributed company billing

Compliance, safety and people

Control technical assurance, safe work and site access without fragmenting the evidence trail.

A\$50 / MONTH

04

Veritas Compliance

Capture testing evidence and issue clear, traceable compliance outputs for installed systems and products.

- Post-installed anchor pull, proof, ultimate and shear testing
- Height-safety anchor certification and recertification records
- Anchor specifications, test loads, results and failure modes
- Location-linked photos, elevation markup and equipment records
- Product certification and professional compliance reports

A\$50 / MONTH

05

Veritas Safety

Author, issue and prove the safety controls that support each project and work activity.

- SWMS, JSA, permit, induction and toolbox-talk builders
- Rescue procedures and emergency planning
- ITP templates, instances, hold points and approvals
- Drop, access and site plans with reusable templates
- Digital sign-on, attendance and acknowledgement records

NO FLAT MODULE FEE

06

Veritas Workforce

Mobilise the right people with the right credentials, then maintain a live view of site access and attendance.

- People and employer directories with role and payer controls
- Inductions, credentials, competencies and expiry tracking
- Project mobilisation and external contractor acceptance
- Site sign-on, access status, attendance and muster
- Employer portal and company, employer or self-pay billing

PER PERSON PRICING

\$

Choose the lower-cost plan

Mix plans person by person. Visitors, delivery personnel and regulators are not metered.

- **A\$5** per active Veritas site, per person, per month
- **A\$150** per person, per month for unlimited sites
- Unlimited is the cost cap above approximately 30 sites monthly
- Month-to-month with no fixed annual commitment
- Company staff can be configured as included

From invitation to safe site access

Workforce is more than a sign-on tool. It creates a reusable identity and compliance record for each person, then applies project and site requirements wherever they work.

01

People directory

Maintain workers, staff, visitors and other person types with contact details, status, employer and billing responsibility.

02

Employer organisations

Manage contractors, subcontractors, suppliers and consultants, including employer contacts, crews and company-pay settings.

03

Credentials

Track licences, competencies, evidence and expiry dates so project teams can see who is ready before mobilisation.

04

Inductions

Issue induction programmes and requirements through secure invitation links, with completion retained against the person.

05

Mobilisation

Assign people to projects and sites, confirm external contractor acceptance and apply the right access requirements.

06

Access and muster

Record sign-on, attendance and site access status, then provide a live muster view for operational and emergency use.

Faster onboarding

Reuse verified people and credentials across projects.

Better compliance

See requirements, evidence and expiry risk in one place.

Clear accountability

Know the employer, payer and access status for each person.

Live site visibility

Connect mobilisation, sign-on, attendance and muster.

Employer self-service is built in

The employer portal lets authorised organisation users manage their crew, payment method, plan selection and monthly invoices without exposing the host workspace's internal administration.

Choose the best plan for each person

PER-SITE PLAN

A\$5 / active site / person / month

Best for people who work across a small or changing number of Veritas sites. Repeated activity at the same site in the same month remains one site-month charge.

- Pay only for sites where the person is active
- Automatically scales down in quieter months
- Ideal below approximately 30 active sites monthly

UNLIMITED PLAN

A\$150 / person / month

A monthly cost cap for high-volume people. Every Veritas site is covered for that person while the plan remains active.

- Unlimited active sites for the person
- Predictable maximum monthly cost
- Month-to-month with no fixed annual commitment

Active sites for one person	Per-site plan	Unlimited plan	Lower-cost choice
1 site	A\$5	A\$150	Per site
5 sites	A\$25	A\$150	Per site
10 sites	A\$50	A\$150	Per site
20 sites	A\$100	A\$150	Per site
30 sites	A\$150	A\$150	Equal
40 sites	A\$200	A\$150	Unlimited

Mix plans across the workforce

A company can keep occasional workers on per-site billing and place high-volume workers on unlimited billing. Plan selection is per person, so one expensive blanket subscription is not required.

Who is not metered

Visitors, delivery personnel and regulators are excluded from Workforce metering. Company staff can also be configured as included by the workspace's commercial arrangement.

How usage becomes a clear invoice

The billing model routes each charge to the responsible company, employer or person while preserving a full audit trail.

01

Set the person and payer

Link the worker to an employer and choose company-pay, employer-pay or self-pay responsibility.

02

Select the plan

Use A\$5 per active site or the A\$150 monthly unlimited plan for that person.

03

Record site activity

Mobilisation and site activity create an idempotent person-site-month usage record.

04

Invoice the right payer

Company staff flow to the weekly ledger. External employers and self-paying people receive monthly billing.

Company workspace pays

Tenant staff and the principal organisation use the company billing method. Open Workforce lines are visible in Admin Billing and roll into the weekly company invoice.

Employer organisation pays

A contractor or labour-hire organisation can pay for its crew. Its authorised portal users can manage the organisation card and review invoices.

Worker pays

A person can be assigned self-pay responsibility. Their active site-months or unlimited plan are billed through their Workforce billing profile.

Linked workspace pays

For accepted cross-company assignments, the linked employer workspace can use its own Admin Billing card while the host retains site oversight.

No duplicate site-months

One person, one site and one month form one metered usage line.

Fair cost allocation

Charges follow the responsible payer instead of defaulting to the host.

Predictable cost cap

Unlimited pricing protects high-volume workers from open-ended site fees.

Operational visibility

Admins can review projected, included, invoiced and failed lines.

Billing does not replace safety controls

Tenant staff are not blocked from a required safety sign-on because a company card is missing. The platform records the usage and warns administrators so safety activity and financial follow-up remain separate.

Pay when a deliverable is created

Current default usage prices.
Regeneration terms vary by output
and are shown in the app before
confirmation.

DELIVERABLE	WHAT IT COVERS	DEFAULT PRICE
Daily docket close	Finalised daily field record with labour, work, evidence and site notes.	A\$20
Inspection report Non-engineering review	Professional condition report for the current defect list, without engineering sign-off.	A\$250
Engineering inspection report RPEQ / RPEng / RPE, TRSC certified	Engineering review and certification pathway with professional sign-off.	A\$2,000
Maintenance works report	Unlocks report generation for a works package, including completion and summary outputs.	A\$50
Compliance report	Anchor-test report or height-safety certification output.	A\$250
Remediation progress report	Current repair status, before and after evidence, outstanding items and reporting-period activity.	A\$50
Scheduled remediation progress report	Automated progress pack. Quiet periods are skipped and create no charge.	A\$50 each
Remediation closeout report	Final handover pack with repair sheets, ITP disposition, safety, attendance and exclusions.	A\$250
Building remediation summary	Single-building summary across remediation packages, status and timeline.	A\$35
Portfolio remediation summary	Cross-building overview with status analysis and progress tracking.	A\$75

Report unlock rules are clear before payment

For inspection reports, payment covers the current defect list and allows regeneration while that list remains unchanged. Adding defects later requires a new unlock. Maintenance works reports unlock unlimited report generation for the relevant works package.

Digital asset services

Store evidence, request spatial capture and use AI-assisted workflows with transparent metering.

ORGANISATION STORAGE

A\$15

 / 15GB / month

Shared storage for photos, reports, drawings, evidence files, fusion images and 3D model assets.

- Starts in 15GB blocks
- Auto-expands when an upload exceeds the active tier
- Prorated across weekly company invoices

LIDAR SCANNING RFQ

A\$5

 / m² estimate

Draw the proposed scan area on the map and receive an immediate estimate before submitting the quote request.

- Map-based area measurement
- Preferred date and access requirements
- Final scope and rate reviewed through the RFQ process

AI TOOLS

Usage

 based

AI supports defect analysis, report drafting, document extraction and assisted platform workflows.

Claude Haiku 4.5 **A\$2 / A\$10**

Input / output per 1M tokens

Claude Sonnet 4.6 **A\$6 / A\$30**

Input / output per 1M tokens

Claude Opus 4.6 **A\$10 / A\$50**

Input / output per 1M tokens

3D model hosting uses organisation storage

LiDAR and photogrammetry point clouds can be uploaded, processed and viewed against the asset record. Their files count toward the same 15GB organisation storage blocks. Fusion processing and inspection completion can also support tenant-specific configured rates; no universal default charge is applied unless configured.

AI rates come from the platform AI configuration

The displayed customer rates are the current configured billed rates. Usage is measured by input and output tokens and appears on the company billing record.

See how the pricing combines

SCENARIO A

Facade consultancy

Facade and Safety modules, two standard inspection reports, three closed dockets and one storage block.

2 discipline modules	A\$100
2 standard reports	A\$500
3 docket closes	A\$60
15GB storage	A\$15

A\$675

Illustrative month before card fee and other usage.

SCENARIO B

Multi-discipline contractor

MEP, Safety and Compliance modules, one maintenance report, one compliance report and two storage blocks.

3 discipline modules	A\$150
1 maintenance report	A\$50
1 compliance report	A\$250
30GB storage	A\$30

A\$480

Illustrative month before card fee and other usage.

SCENARIO C

Small mobile workforce

Workforce module enabled for four people, each active across three Veritas sites in the month.

Workforce flat module fee	A\$0
4 people x 3 sites x A\$5	A\$60

A\$60

Visitors, delivery personnel and regulators are not metered.

SCENARIO D

High-volume worker

One worker operates across more than 30 active Veritas sites and uses the monthly unlimited cost cap.

Unlimited Workforce plan	A\$150
Additional active sites	A\$0

A\$150

Plan selection is month-to-month and can vary by person.

Use the platform where the work happens

Module subscriptions cover access to the discipline workflow. Usage pricing is tied to deliverables, active people, site activity, data storage and AI consumption, so costs scale with actual platform value.

One clear billing rhythm

01

Activate modules

Add only the discipline and product modules needed by the workspace.

02

Create value

Generate reports, close dockets, store data, use AI and mobilise people.

03

Review the ledger

See open lines, asset attribution, Workforce usage and estimated card fee.

04

Weekly collection

Eligible company charges are combined into one Stripe invoice each week.

Commercial notes

- All figures in this guide are AUD.
- Card processing is 1.75% plus A\$0.30, applied once to the weekly invoice total where weekly billing is used.
- Immediate one-off checkout may apply the same processing fee to that payment.
- Module fees are prorated across weekly invoices in weekly-ledger mode.
- GST treatment and invoice tax detail follow the issued invoice.

Pricing controls

- This guide shows current platform default pricing as at July 2026.
- Some rates can be configured for an individual workspace or through its Stripe price setup.
- The price displayed in the app at activation or confirmation is the governing price for that transaction.
- Grandfathered, included, waived or billing-exempt access may produce no charge.
- Final LiDAR scanning scope and commercial terms are confirmed through the RFQ process.

READY TO CONFIGURE YOUR WORKSPACE?

Start with one discipline. Add capability as the portfolio grows.

Veritas Inspect brings assets, technical inspections, evidence, safety, workforce, reporting and billing into one tenant-branded platform.

Pricing summary: Facade A\$50/month; Structures A\$50/month; MEP A\$50/month; Compliance A\$50/month; Safety A\$50/month; Workforce A\$5/person/site/month or A\$150/person/month unlimited; storage A\$15/15GB/month; LiDAR scanning estimate A\$5/m²; reports and other usage as listed in this guide.
